

Control Software

MCS 3000

- IEC 61000-4-5
- EN 61643-1
- GB/T 17626.5
- GB/T 18802.1

Features

- > High-level software architecture with remote PC control
- > Customizable test procedures based on user requirements
- > Automatic test procedure storage and backup management
- > Automatic recognition of lower-level controller parameters without manual configuration
- > Oscilloscope integration for a complete test and measurement system
- > Automatic test report generation

Introduction

MCS 3000 Control Software is a Windows-based remote control platform for S-series impulse current generators and SG-series surge generators. Through RS232 communication, it enables flexible test procedure configuration with programmable operation modes. The intuitive interface simplifies testing, improves efficiency, reduces labor requirements, and minimizes human operation errors.

Application Areas

SUZHOU 3CTEST ELECTRONIC CO., LTD.

Address: No. 99 E'meishan Road, SND, Suzhou, Jiangsu Province, China

E-mail: globalsales@3ctest.cn

Service: service@3ctest.cn

Tel: +86 - 512 - 68077192

Web: www.3ctest.com

3CTEST is always striving for product innovation and quality improvement. Product appearance and technical specifications are subject to change without further notice.
